HONOURING VETERANS: CROP VARIETY NAMING PROJECT

The management, staff and shareholders of FP Genetics wish to offer our sincere thanks to all veterans, past and present, for their service to country and community.

In 2021, FP Genetics and The Royal Canadian Legion, Saskatchewan Command entered into a collaboration that seeks to recognize veterans and the sacrifices made on our behalf by launching our variety naming project. This program affords the public an opportunity to name new crop varieties after deserving veterans in their communities.

Variety names are unique globally, unaltered by time, and allow us to keep veterans and the stories of their contributions to our society front and center year round.

Since its inception, this program has named 13 new crop varieties after deserving veterans. Their stories can be found within the pages of this guide, and by visiting The Royal Canadian Legion, Saskatchewan Command website.

If there is a veteran in your family or community that you would seek to recognize through this program, please visit sasklegion.ca/fp-genetics to find out more information and submit an application.

AAC Hockley - Released 2023

Canadian Western Red Spring

- **Total performance across Western Canada**
- Consistently high yields
- Superior standability
- Short semi-dwarf
- High protein – similar to Carberry
- Unsurpassed disease package
 - Rated 'MR' or better for all Priority 1 diseases
- Next level performance over AAC Brandon and AAC Viewfield in yield, disease resistance and standability

Commercial Varieties in Parentage: Alsen, CDC Plentiful, Infinity

"Total performance across Western Canada"

John "Jack" Hockley

Jack Hockley was born in the Yellow Grass area in 1926. Jack joined the Canadian Army during World War II. He served with Pacific Command, and was honourably discharged in Regina in April 1946. Jack has been a member of the Maple Creek Legion Branch #75 for thirty years.

SY Manness - Released 2023

Canadian Western Red Spring

- **Outstanding yield potential**; 113% of Carberry in registration trials
- Top yielding CWRS in Manitoba
- Excellent standability
- Short semi-dwarf
- Earlier maturing than Carberry
- Ideally suited for Manitoba and Eastern Saskatchewan regions

Commercial Varieties in Parentage: Faller

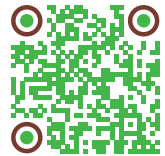

Variety	Maturity (days)	Height (cm)	Lodging	Protein (%)	Sprouting	Test Weight (+/- kg/hL of check)	TKW (+/- g of check)	Stem Rust	Leaf Rust	Stripe Rust	Bunt	FHB

Source: 2023 Manitoba Seed Guide and Request for Support to Register BW1093 (SY Manness)

Sidney Manness

Sid enlisted in the R.C.A.F. in the fall of 1941 and was trained to be an aero-engine mechanic servicing Anson II planes. He was discharged in 1945 and returned to the family farm near Domain, MB. Sid has always been a strong supporter of the Legion, and in 1947 was a founding member of the Domain Legion Branch #208.

Growers thrive.

CDC Silas - Released 2023

Canadian Western Red Spring

- Very high yield potential; 112% of Carberry in registration trials
- Semi-dwarf
- Good standability
- Strong rust resistance
- Maturity equal to Carberry
- Ideally suited to the Saskatchewan Parkland and Northern Alberta regions

Commercial Varieties in Parentage: Alsen, CDC Bounty

**“Very high
yield
potential”**

Semi-dwarf

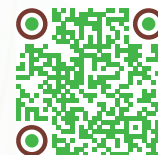

Variety	Yield (% Carberry Area 1&2)	Yield (% Carberry Area 3&4)	Maturity (days)	Height (cm)	Lodging	Test Weight (+/- kg/hL of check)	Kernel Weight (+/- mg of check)	Sprouting	Protein (%)	Stem Rust	Leaf Rust	Stripe Rust	Bunt	FHB

Silas Campbell

Silas Campbell joined the Royal Canadian Air Force in 1943 and was posted in England in 1944. Si was a tail gunner on a Lancaster Bomber and flew 36 missions over Germany. In August 2022, Si will be 98 years young. He has 17 grandchildren and loves to golf whenever possible.

AAC Viewfield

Canadian Western Red Spring

- High yielding across all Western Canada
- Exceptional performance in dry conditions
- Excellent standability
- Short semi-dwarf
- Good sprouting resistance

Commercial Varieties in Parentage: Glenn, Stettler

Variety	Maturity (days)	Height (cm)	Lodging	Protein (%)	Sprouting	Test Weight (+/- kg/hL of check)	TKW (+/- g of check)	Stem Rust	Leaf Rust	Stripe Rust	Bunt	FHB

Frederick Edward Hodge

Frederick Hodge was born May 17, 1919 in Winnipeg, MB. He joined the Royal Winnipeg Rifles in 1938 and went overseas in 1941. A Major with the 7th Infantry Brigade, Hodge was part of the initial assault on Juno Beach, D-Day June 6, 1944. Hodge was taken as a prisoner of war and later executed.

Breeders innovate.

CDC Adamant VB

Canadian Western Red Spring | Midge Tolerant

- Wheat midge and wheat stem sawfly tolerance
- Top-in-class stem solidness rating
- Higher yielding; 108% of Carberry in registration trials
- Early maturing
- High protein

Commercial Varieties in Parentage: McKenzie, Gus, Unity
 Refuge: CDC Bradwell

Variety	Yield (% Carberry Area 3&4)	Maturity (days)	Height (cm)	Lodging	Test Weight (kg/hL)	Kernel Weight (mg)	Protein (%)	Sprouting	Stem Rust	Leaf Rust	Stripe Rust	Bunt	FHB	Midge Tolerant	Stem Solidness

AAC Darby VB - New 2025

Canadian Western Red Spring | Midge Tolerant

- Very early maturing midge tolerant wheat, 5 days earlier than Carberry, 1 day earlier than Parata
- **Only significantly early maturing midge tolerant CWRS**
- High yielding 105% of Carberry , equal to Viewfield and Brandon
- Midge tolerant – AAC Hassler refuge variety
- Good protein, similar to Carberry
- I for FHB, MR or better for all rusts

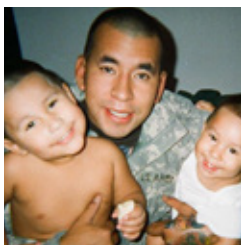

Source: Request for Support to Register PT495 (AAC Darby)
 Commercial Varieties in Parentage: CDC Titanium, Peace
 Refuge: AAC Hassler

Source: 2023 Sask Seed Guide

Deon Hassler

Deon served in the U.S. Navy, maintaining ships water boilers and sewage systems. He returned to his family home in Saskatchewan to work with Indigenous communities, ensuring the health and safety of their water supplies. In 2019 he received the National First Nations Water Leadership Award from Indigenous Services Canada.

AAC Magnet

Canadian Western Red Spring

- Early maturing, field observed up to 5 days earlier
- High protein
- Strong disease package including 'MR' for FHB
- Strong lodging resistance
- Easy to harvest
- Yield; 105% of Carberry

Source: 2022 Manitoba Seed Guide
Commercial Varieties in Parentage: Alsen, Howell, Lars, McKenzie

Variety	Maturity (days)	Height (cm)	Lodging	Protein (%)	Sprouting	Stem Rust	Leaf Rust	Stripe Rust	Bunt	FHB	Midge Tolerant

Wesley Robert McKeith

Wes volunteered for the Army in 1941 and went overseas in 1943. Assigned to the 6th Armoured Regiment, his unit was deployed to Western Europe. On April 13, 1945, near Apeldoorn, Holland, his tank was hit by an armour-piercing shell, killing Wes and one of his crew. He is buried at the Holten Canadian War Cemetery in Holland.

AC[®] Summit

White Milling Oat

- Excellent disease package
 - 'I' for multi-gene crown rust, stem rust and barley yellow dwarf disease
- Short stature, good lodging resistance
- Easy to harvest with mid-maturity
- Desired milling qualities: high beta glucan, high test weights and low hull percentage

Commercial Varieties in Parentage: AC[®] Ronald, AC Rebel, Dumont

Julius Brown

Julius was born in South Carolina and served in the U.S. Air Force. He is the director for OSI-CAN, a program started in Saskatchewan providing mental health support services to Canadian veterans and first responders dealing with operational stress injuries.

Growers thrive.

DL Delicious Forage Pea

DL Delicious is a new semi-leafless forage pea. It has high forage yields, better standability and matures earlier than the industry standard, 40-10 pea.

- Very high yielding; 114%* over 40-10 peas
- Improved standability over 40-10 peas
- Early maturing
- High protein content

Breeders innovate.

About Us

FP Genetics is wholly-owned by over 170 Local Seed Professionals.

FP Genetics results-driven approach has developed the most ambitious conduit for accessing, testing and selecting the leading new commercial varieties that solve today's local farming challenges. Together we are 100% committed to relentlessly seeking out and connecting the best new varieties for Canadian farmers by working collaboratively with an innovative network of breeders, seed professionals and partners, driven by localized agronomic performance and economic success.

Wireworms are full of tricks...but so are we.

With years of quality experience, we know every trick in the book.

We've spent serious time studying the wireworm's many yield-stealing tricks. And we've got a tried and tested solution for your cereals: Cruiser® Vibrance® Quattro seed treatment. It delivers all-in-one insect and disease protection so you can curb wireworm feeding and get your crop off to a vigorous, strong-standing start.

 **Cruiser® Vibrance® Quattro**

You're one click away from supporting Canada's Veterans

Join The Royal Canadian Legion
and give back to those who served.

Help us help Veterans and their families

Join a community that never stops giving back. When you become a Legion member, you help improve the lives of those who served, support our communities and ensure Canada never forgets.

Plus, joining the Legion brings you countless opportunities to get involved in your community and have fun with your fellow members. And with 1,350 Branches in Canada and around the world, your local Legion Branch may be closer than you think.

Help honour Canada's Veterans by joining the Legion community today.
Anyone can be a member (membership fees average just \$50 per year).

Join today at [Legion.ca/Support](https://legion.ca/support)

Serving or retired CAF or RCMP members and their eligible family members can apply for their **first** year of membership **FREE!**
